July 05, 2022

Share price: A\$0.18

Target: A\$0.70

## Production expected to bounce back in 3Q22

- June production was impacted by the gas processor's scheduled plant turn-around in Thorsby that resulted in production being reduced by 625 boe/d for seven days. This work was anticipated and is included in the company's budget and production guidance.
- At Brooks, the gas compressor at the 2-29 battery went down on 24 June. The compressor was replaced in ~6 days during which production was reduced to around 50% of capacity.
- Production is expected to be back at ~4.1 mboe/d in early July. This is expected to grow further with the expected imminent tie-in of production from Gemini#8, Gemini#9 and Leo#4.
- We have reduced our production forecast for 2Q22 from ~4.3 mboe/d to 3.7 mboe/d and from 4.3 mboe/d to 4.2 mboe/d in 3Q22. We continue to forecast ~5.0 mboe/d in 4Q22.
- We have marginally reduced our FY22 production forecasts from ~4.4 mboe/d to ~4.2 mboe/d.
- We have also slightly reduced our target price from A\$0.75 to A\$0.70 per share. The results of the Leo#4 well (that could have a positive impact on the company's 2P reserves) in 3Q22 could be a catalyst to re-rate the share price.

## Increased yield and buyback

The initial half yearly dividend of A\$2.5 mm (~A\$0.04 per share) now represents ~4.5% yield on an annualized basis. The company can also buy back up to 10% of its issued capital in any 12 month period. As at 5 July, Calima has already bought back ~2.2 mm shares.

## Still a value name

We forecast that Calima's YE23 net cash will represent ~50% of the company's current market cap. We also forecast YE24 net cash will represent ~80% the current market cap. This is after the company pays a 4.5% dividend in each of 2023 and 2024.
